DETAILED ACTION

Information Disclosure Statement

1. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609.04(a) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the forward time-reversed, the forward block processor must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering

Art Unit: 2611

of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

3. Claims 1, 2 are objected to because of the following informalities: Appropriate correction is required.

Regarding claim 1, line 4, the term "prefiler" should be --pre-filter--; the term "DFE" should be spelled out; line 15, the term "equalizer" should be --the equalizer--.

Regarding claim 2, line 2, the term "accurate estimator" should be --the accurate estimator--, line 4, the term "said estimator" should be --the accurate estimator--; line 8, the term "defined in claim 2" should be deleted; line 12, the term "The digital baseband receiver of claim 1" should be deleted as set forth in lines 16 and 17.

Claim Rejections - 35 USC § 112

4. Claims 1-6 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The specification fails to disclose the time-reversed block processor and the forward block processor.

Claim Rejections - 35 USC § 112

5. Claims 2, 3, 5, 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 2, line 12, the term “the low complexity equalizer” lacks antecedent basis; line 16, the term “the soft-output Viterbi signal detector” lacks antecedent basis; line 20, the term “the detection controller” lacks antecedent basis.

Regarding claim 3, line 1, the term “said MAP decoding algorithm means” lacks antecedent basis.

Regarding claim 5, line 1, the term “said input” lacks antecedent basis.

Regarding claim 6, the term “the sampler” lacks antecedent basis.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Cheng U.S. Pat. 6,745,352) disclose a method of estimating error rates for communication received using iterating processing and related receivers.

Onggosanust et al (US 2004/0203456 A1) disclose a wireless system with hybrid automatic retransmission request in interference limited communication.

Panther (U.S. Pat. 7,010,064) discloses a channel delay spread adaptive equalization and decoding.
